
CATLIN

Further to the recent press release regarding the change in senior management at Catlin Canada, we would like to take this opportunity to confirm that Catlin is fully committed to the Canadian market in all lines and we continue to aim to expand our business in Canada in terms of both volume and products. All of our underwriting teams are available and operating on a business as usual basis.

There will inevitably be some structural changes in the near future, and we plan to add additional senior market practitioners to Catlin Canada to support our development and to enhance our products and services.

We can also advise that it has been mutually agreed that Debbie Drost, Vice President Underwriting and Judy Andersen, Vice President Marketing & Business Development will leave the company to pursue other interests. We thank them for their considerable contributions to the development of Catlin Canada and wish them well in their future endeavours.

We greatly appreciate your support, and we look forward to continuing to develop our relationships further.

I will be spending a significant amount of time in Toronto over the next several weeks and will be happy to meet with you to discuss our plans.

If you have any questions, please do not hesitate to contact me or your regular underwriters.

Mike Hansen

President
Catlin Canada
